

VIPUL PATIL

Biology Subject Matter Expert | AI Scientific Evaluator

vipulpatil6667@gmail.com | +91 8602356667 | Bhopal, India

PROFESSIONAL SUMMARY

Biology Subject Matter Expert with a Master's in Microbiology and dedicated experience in scientific data validation, complex prompt engineering, and AI output evaluation. Adept at architecting multi-constraint prompts for advanced models, including ChatGPT Plus and Google AI Pro, to rigorously audit and refine highly technical life-science datasets. Proven track record of evaluating complex biological concepts, identifying model hallucinations, and enforcing strict logical consistency against academic standards. Combines deep domain expertise with robust quality assurance methodologies to deliver flawless human-in-the-loop (HITL) feedback, perfectly aligned for specialized AI data training, red teaming, and supervised fine-tuning workflows.

CORE SKILLS

- **AI Content & Output Validation:** Complex Prompt Engineering, AI Output Fact-Checking, Model Hallucination Detection, Human-in-the-Loop (HITL) Review, AI Assisted Content Workflows (ChatGPT Plus, Google AI Pro).
- **Scientific Domain Expertise:** Advanced Microbiology, Life Sciences, Biotechnology, Environmental Microbiology, Clinical Diagnostics, Anatomy & Physiology, Academic Research Validation.
- **Quality Assurance & Data Auditing:** Scientific Fact-Checking, Logical Consistency Auditing, Qualitative Data Validation, Technical Documentation QA, Educational Curriculum Alignment.
- **Technical Frameworks & Methodologies:** Agile/Scrum, Sprint Planning, Cross-Functional Workflow Management, Digital Evaluation Systems.

PROFESSIONAL EXPERIENCE

Spark VR Pvt. Ltd.

Biology SME & AI Content Validator | February 2026 - Present | Indore, India

- Design and execute highly complex, multi-constraint prompts using advanced generative AI models (including ChatGPT Plus and Google AI Pro) to structure scientifically accurate biological and educational frameworks.
- Evaluate and validate AI-generated life-science data against rigorous academic standards, systematically identifying, flagging, and correcting model hallucinations in microbiology and physiology concepts.
- Perform comprehensive quality assurance on automated scientific scripts, ensuring strict logical consistency, factual accuracy, and precise alignment with defined technical parameters.
- Translate dense, complex biological processes into structured, logical data flows, collaborating with technical and production teams to ensure production-ready digital outputs.

Phibonacci Solutions Pvt. Ltd.

Subject Matter Expert - Biology (Scientific Data Auditor) | November 2023 - January 2026 | Ahmedabad, India

- Audited complex experimental data, technical assessments, and digital learning modules to detect scientific inaccuracies, logical inconsistencies, and qualitative data errors.
- Validated academic biology datasets, serving as the final scientific authority to guarantee flawless content accuracy and strict curriculum alignment.
- Partnered with cross-functional QA teams to execute end-to-end data evaluation workflows, standardizing review processes and technical documentation protocols.
- Operated within an Agile framework, actively participating in sprint planning and daily stand-ups to optimize content validation cycles and resolve cross-functional bottlenecks.

MDN Future School & Sanskar Innovative School

Scientific Domain Expert & Data Analyst | January 2022 - December 2023

- Distilled highly complex metabolic, genetic, and physiological frameworks into logically consistent, structured informational modules for end-users.
- Designed and implemented digital evaluation architectures, analyzing performance datasets to optimize knowledge delivery and drive a 12% improvement in standardized metric outcomes.

Rabindranath Tagore University

Subject Matter Expert: Microbiology & Laboratory Research | September 2019 - July 2022 | Bhopal, India

- Acted as the primary domain expert for advanced environmental microbiology, clinical diagnostics, and computational laboratory methodologies.
- Directed complex laboratory research and structured microbiology data analysis, strictly enforcing scientific-method integrity and empirical accuracy.

Mystance Consultancy (Sanskar Valley School)

Remedial Data Analyst | June 2019 - January 2020 | Bhopal, India

- Analyzed comprehensive performance datasets to identify conceptual anomalies and logical gaps, designing targeted, data-driven intervention strategies to improve retention metrics by 25%.

EDUCATION

- **M.Sc. in Microbiology** | Barkatullah University | 2018 | Score: 84%
- **Bachelor of Education (B.Ed.)** | Barkatullah University | 2021 | Score: 80%
- **B.Sc. in Microbiology** | Barkatullah University | 2016 | Score: 73%
